What Can You Earn: Itzhome is a Marketplace

The Itzhome platform operates as a marketplace, simplifying the payment process for all parties involved. Payments are collected centrally through the Itzhome platform via our payment partner Stripe.

Through the Stripe connect payment facility payments are then automatically sent to you each week for the services you provided.

This automated process ensures you do not need to spend significant time managing payments, allowing you to focus on delivering a great service to your clients.

The exact percentage split of the fees varies depending on the service provided.

Using cleaning services as an example you are likely to receive approximately 70% of the intital payment.

Each territory and percentage splits differs slightly based on:

- Local Market Conditions
- The Service Being Provided
- The Support Fee Being Charged

When we speak, a more detailed breakdown will be provided.

There is also an additional charge to cover ongoing support.

This fee is deducted straight from the percentage you receive

This fee is approximately 7% and deducted directly from what you receive.

This means in this example you would receive 65.1% of the total booking fee. The remaining percentage is for providing the job to you and the chargers incurred.

EXPENDITURE:

As with any business, it's not just about the income you generate, but also the overheads you manage, which ultimately affect your bottom line profitability. While we've outlined the direct costs associated with the income you generate, it's important to consider your operating costs as well. These include your expenses for delivering your service. Be sure to calculate all your associated costs for service delivery when projecting how much you will earn.
